Click! customers with a digital TV can view channels 2-82, and associated HD channels (with an HDTV), without a cable receiver by using the scanning function on their TV. Customers with an older, analog TV need a DTA or cable receiver for channels 20 and above. To view channels 120 and above, including the Sports and Family package, premiums and International, you need a cable receiver. HD viewing for channels 120 and above requires an HDTV and either an HD receiver or an HD/DVR receiver. Deposit may be required for equipment.
