NOTE—If you have a digital TV not connected to a cable receiver, it is important to auto program your TV to ensure you are viewing the digital version of your channels. On most HDTVs, the HD channels will be at a .1 position, for example 29.1 for Discovery HD. On most digital TVs, the standard definition channels will be at a .2 position, for example, 29.2. These examples apply to most channels, from 2-100, in the Broadcast and Standard packages. Refer to the owner's manual for your specific TV for auto programming instructions. This only applies to customers with Broadcast and Standard levels of service.
